

Ted Siegan & SuSu Wing- Arlington, MA

Ted Siegan & SuSu Wing consider themselves socially progressive, so when the Solarize Massachusetts program came to their Arlington community, it was a no-brainer to install the 2.5kW solar system, a relatively small system which provides over 100% energy usage offset. Ted & SuSu take pride in their energy efficient house and self-sufficient lifestyle, where they replaced lighting to CFLs, updated insulation and continue to grow lush vegetable and fruit gardens. Installing solar only added to their savings, "our payback will be about 4.5 years. That's a 22% return on investment".

SolarFlair worked with the Siegan-Wings to account for future electricity needs and mounted extra panels to power a hybrid vehicle. They are among 160 other families that contracted installations through Solarize Arlington in partnership with SolarFlair, a program that offers discounts of about \$750-\$2500 to each home.

SuSu Wing is a videographer and artist. Ted Siegan is a local Realtor for Coldwell Banker Residential Real Estate and can be reached at TedSiegan@gmail.com.

- **System Energized on: January 21, 2013**
- **System Size: 2.5kW**
- **Panels: Suntech STP250S-20/Wd**
- **Quantity of Panels: 10**
- **Inverter(s): 10 Enphase Microinvertes M215-60-2LL-S22**
- **Estimated Annual Production: 3,033 kWh**
- **Carbon Dioxide Emissions Displaced over 25 years: 46 Tons**
